1 Introduction

1.1 Abstract

Welcome to the **Drone ERP User Manual** for Wingspann Global Pvt Ltd. This document provides a comprehensive operational guide for managing day-to-day operations using our customized Odoo Enterprise Resource Planning (ERP) platform. This manual covers detailed, step-by-step instructions for utilizing the system to handle Procurement, Inventory Management, and System Administration.

1.2 System Overview

The Drone ERP system integrates multiple facets of our operations into a single cohesive platform.

Figure 1: Odoo Main Dashboard (Home Menu)

The Main Dashboard provides direct access to the core modules:

- **Purchase:** For managing Request for Quotations (RFQs) and formal Purchase Orders (POs).
- **Inventory:** For tracking stock levels, processing internal transfers, and managing Issue Notes.
- **Settings:** For system administration and configuration.

Note

To access the main dashboard at any time, click the **App Switcher** icon located in the top-left corner of the navigation bar.

2 Purchasing and Procurement

The Purchasing module is responsible for handling all requests for quotations (RFQs) to external vendors and converting them into formal Purchase Orders (POs) once approved.

2.1 Viewing RFQs and POs

Navigate to the **Purchase** app from the main dashboard. This view displays all current RFQs and POs.

Figure 2: Purchase Module Overview (RFQ/PO List)

2.2 Creating a Purchase Order

To create a new Purchase Order:

1. Click the **New** button on the top-left of the Purchase overview screen.
2. Select the **Vendor** from the dropdown list. The vendor's address and GSTIN will automatically populate in the generated PDF if they are configured correctly.
3. Add the required products under the **Products** tab, specifying the **Quantity**, **Unit Price**, and **Taxes**.

The screenshot shows the 'Purchase Order Form View' in the Drone ERP system. The top navigation bar includes 'Purchase', 'Orders', 'Products', 'Reporting', and 'Configuration'. The main header shows 'New Requests for Quotation WSGPL/2026-27/07/005' with a gear icon and a '1 / 5' indicator. Below the header, there are buttons for 'Send by Email', 'Print RFQ', 'Confirm Order', and 'Cancel'. A progress bar at the top right shows 'RFQ' (selected), 'RFQ Sent', and 'Purchase Order'.

The form details include:

- Request for Quotation:** ☆ WSGPL/2026-27/07/005
- Vendor:** Bharat Skytech
- GST Treatment:** Consumer
- Vendor Reference:**
- Currency:** INR
- Order Deadline:** 07/21/2026 11:57:41
- Your Quotation No:**
- Quotation Date:**
- No On-time Delivery Data:** ☐ Ask confirmation
- Deliver To:** My Company, Receipts

Below the details, there are tabs for 'Products' and 'Other Information'. The 'Products' tab is active, showing a table with the following data:

Product	HSN/SAC	Description	Quantity	Unit Price	Taxes	Tax excl.
8 x XL4016E1 DC-DC 12A 300W Step-Down 5-40V to 1.2-35V Adjustable P...	8 x XL4016E1 DC-DC 12A 300W Step-Down 5-40V to 1.2-35V Adjustable Power Supply Module	8.00	268.00	18% GST P	₹ 2,144.00	

Figure 3: Purchase Order Form View

2.3 Printing the Official Purchase Order

Once the RFQ has been confirmed, a custom Wingspann Purchase Order PDF can be generated.

- Click the **Print** menu (gear icon) at the top of the form.
- Select **Purchase Order**.

Note

The printed PO automatically includes the Wingspann header, standard Terms & Conditions, and the specialized multi-tier signature block (Prepared By, Finance, Verified By, Directors) as per company policy.

3 Inventory and Stock Management

The Inventory module allows for robust tracking of stock across multiple locations, facilitating internal transfers, receipts, and deliveries.

3.1 Inventory Overview

Navigate to the **Inventory** app from the main dashboard. This dashboard gives a quick glance at Receipts, Deliveries, and Internal Transfers.

Figure 4: Inventory Operations Overview

3.2 Managing Internal Transfers and Issue Notes

An Issue Note is generated when stock is transferred internally (e.g., from a main warehouse to a manufacturing site or testing facility).

To process an internal transfer:

1. Click on **Internal Transfers** from the Inventory overview.
2. Select an existing transfer or click **New** to create one.

Figure 6: Detailed View of an Internal Transfer (Issue Note)

3.3 Printing the Issue Note

Wingspann Global requires an official Issue Note for auditing internal stock movements.

- From the validated transfer screen, click the **Print** icon.
- Select **Issue Note**.

Warning

The printed Issue Note must be signed by the **Indented By**, **Authorized By**, **Issued By**, and **Received By** personnel before the physical transfer is considered fully authorized.

4 System Administration

Administrators hold the responsibility of managing system configuration, backups, and user access.

4.1 Managing User Roles

User roles dictate what an employee can view or edit within the ERP.

1. Navigate to **Settings > Users & Companies > Users**.
2. Select a user and adjust their access rights (e.g., granting "Administrator" rights for Inventory while leaving them as "User" for Purchase).

Security

Only grant Administrator privileges to trusted personnel. Administrators can modify system data, delete records, and alter QWeb templates.

4.2 Maintaining QWeb Templates

Custom PDF templates (such as the Purchase Order and Issue Note) are built using QWeb views inside the `drone_traceability` module.

If structural changes are required (e.g., adding a new signature field):

- Developers modify the XML files in the `custom-addons/drone_traceability` directory.
- Administrators must restart the Odoo service and upgrade the module for changes to take effect.

4.3 Docker Infrastructure

The Drone ERP is containerized using Docker. To apply backend changes or restart the system, use the following commands in the server terminal:

Listing 1: Basic Docker Commands for ERP Maintenance

```
# Restart the Odoo container
sudo docker compose restart odoo

# View real-time logs for troubleshooting
sudo docker compose logs -f odoo

# Completely stop the ERP stack
sudo docker compose down
```

4.4 Database Backups

Database backups should be taken routinely. Use the Odoo Database Manager ([http://\[server-ip\]:8069/web](http://[server-ip]:8069/web)) to generate a `.zip` archive containing the SQL dump and the filestore.
